

The world in which we live is changing, people, manners and customs, technology ... and with amazing speed! Any company who wants to maintain a true success must be constantly self evaluate and at all levels! Safety and in order to relieve you so you concentrate on your vital matters, trust Summum Security to evaluate your needs as far as security concerned.

This audit aims to establish a record:

- a)** different operational points already existing.
- b)** a new record in order to identify and measure risks at different levels:

- 1. organizational
- 2. architectonic
- 3. geographic (site location, population, ...)

Following this study, Summum Security gives you a written report containing observations and recommendations. The purpose of this research is, remember, keep your sustainability by bridging the lack of prevention for the most urgent risks, protect your "values" and improve the security aspect of your business.
